### Perfect 2020 Electronic Time Recorder

This elegant and flexible electronic time recorder offers a range of unique features to help you track and manage employee work hours with ease and efficiency. ITR's 2020 time recorder can be adapted to any possible time card through either selecting a programmed standard card format or by programming the print position. This solution can also be pre-programmed for summer/winter time change and is designed with an automatic calendar and a programmable column position. It has an attractive digital time display and analog quartz clock with power reserve and automatic synchronization and is available in a desktop or wall mounted version.
