ITR Perfect 2040

The perfect solution for calculating work hours, overtime and totals.

- Adjusts automatically for daylight savings time
- Large, bright digital time display
- Standard lithium battery backup of all programmed data and punch records
- Wall or table mount
- Password protected

Optional features:

- Signal control module
- Full power reserve (allows punching during power outages)

ITR supports its customers through a network of regional offices and a central Customer Care Center.

Perfect 2040 Automatic Calculating Time Recorder

Exclusively offered by ITR, the Perfect 2040 calculating time recorder is ideal for larger organizations, accommodating up to 500 employees. This electronic clock calculates hours on a daily and weekly basis, handling break rules, rounding and overtime.

Exceptions in employee attendance, such as leaving early and coming in late, are highlighted in red on the time card. In addition, the clock generates time card reports, and restricts employees from punching in or out during lock out periods.
